

Lego Robotics Club

Lego Robotics is for children ages 5-10. Teams of 3 children will design and construct a model using Legos and motorized parts, present their projects, and build teamwork skills.

The club will be held on Monday afternoons from 4-5 pm. There will be two sessions that last 8 weeks long. **Students must be picked up at 5 p.m. and need to have transportation.**

Session 1: October 1st - November 19th Grades 3-5

Session 2: February 4th - April 15th (extended due to school holidays) Grades K -2

There has been a lot of interest in this opportunity and it is limited to 12 participants per session. We are asking students to write 3-4 sentences about why they would like to participate in the Lego Robotics Club. Please attach their writing to the application. Students will be selected at random and notified if they were selected.

If your child is interested in participating, please complete the form below and return it to school by September 21st.
